YCF Welcomes Schools

THE Youth Care Foundation, The Gambia has welcome principals, teachers and students from their summer holidays.

MATHEMATICS Education is increasingly the single most important factor in determining one's success in school. Public and private schools play a critical role in determining that level of success. "We want to encourage all stakeholders to make 2011/2012 Academic Session a more determined year; there should be better results in WASSCE this session" admonished by the Project Manager.

"Schools are also advised to participate in the organization's annual programs such as the GOMC, PAMO, MTEP, SMP etc. We wish all students, teachers and parents a more rewarding year in a steady stream of well-prepared, capable young people moving into adulthood." said the Development Officer of the organization.

GOMC 2011 Underway

Most students enjoy the pursuit of excellence and seek opportunities to test themselves against their own accomplishments and those of their peers. The Great Olympiads Mathematics Competitions (GOMC) gives such an opportunity to schools and students. The GOMC 2011 is open to all schools in Regions 1 and 2.
